CiviMobile
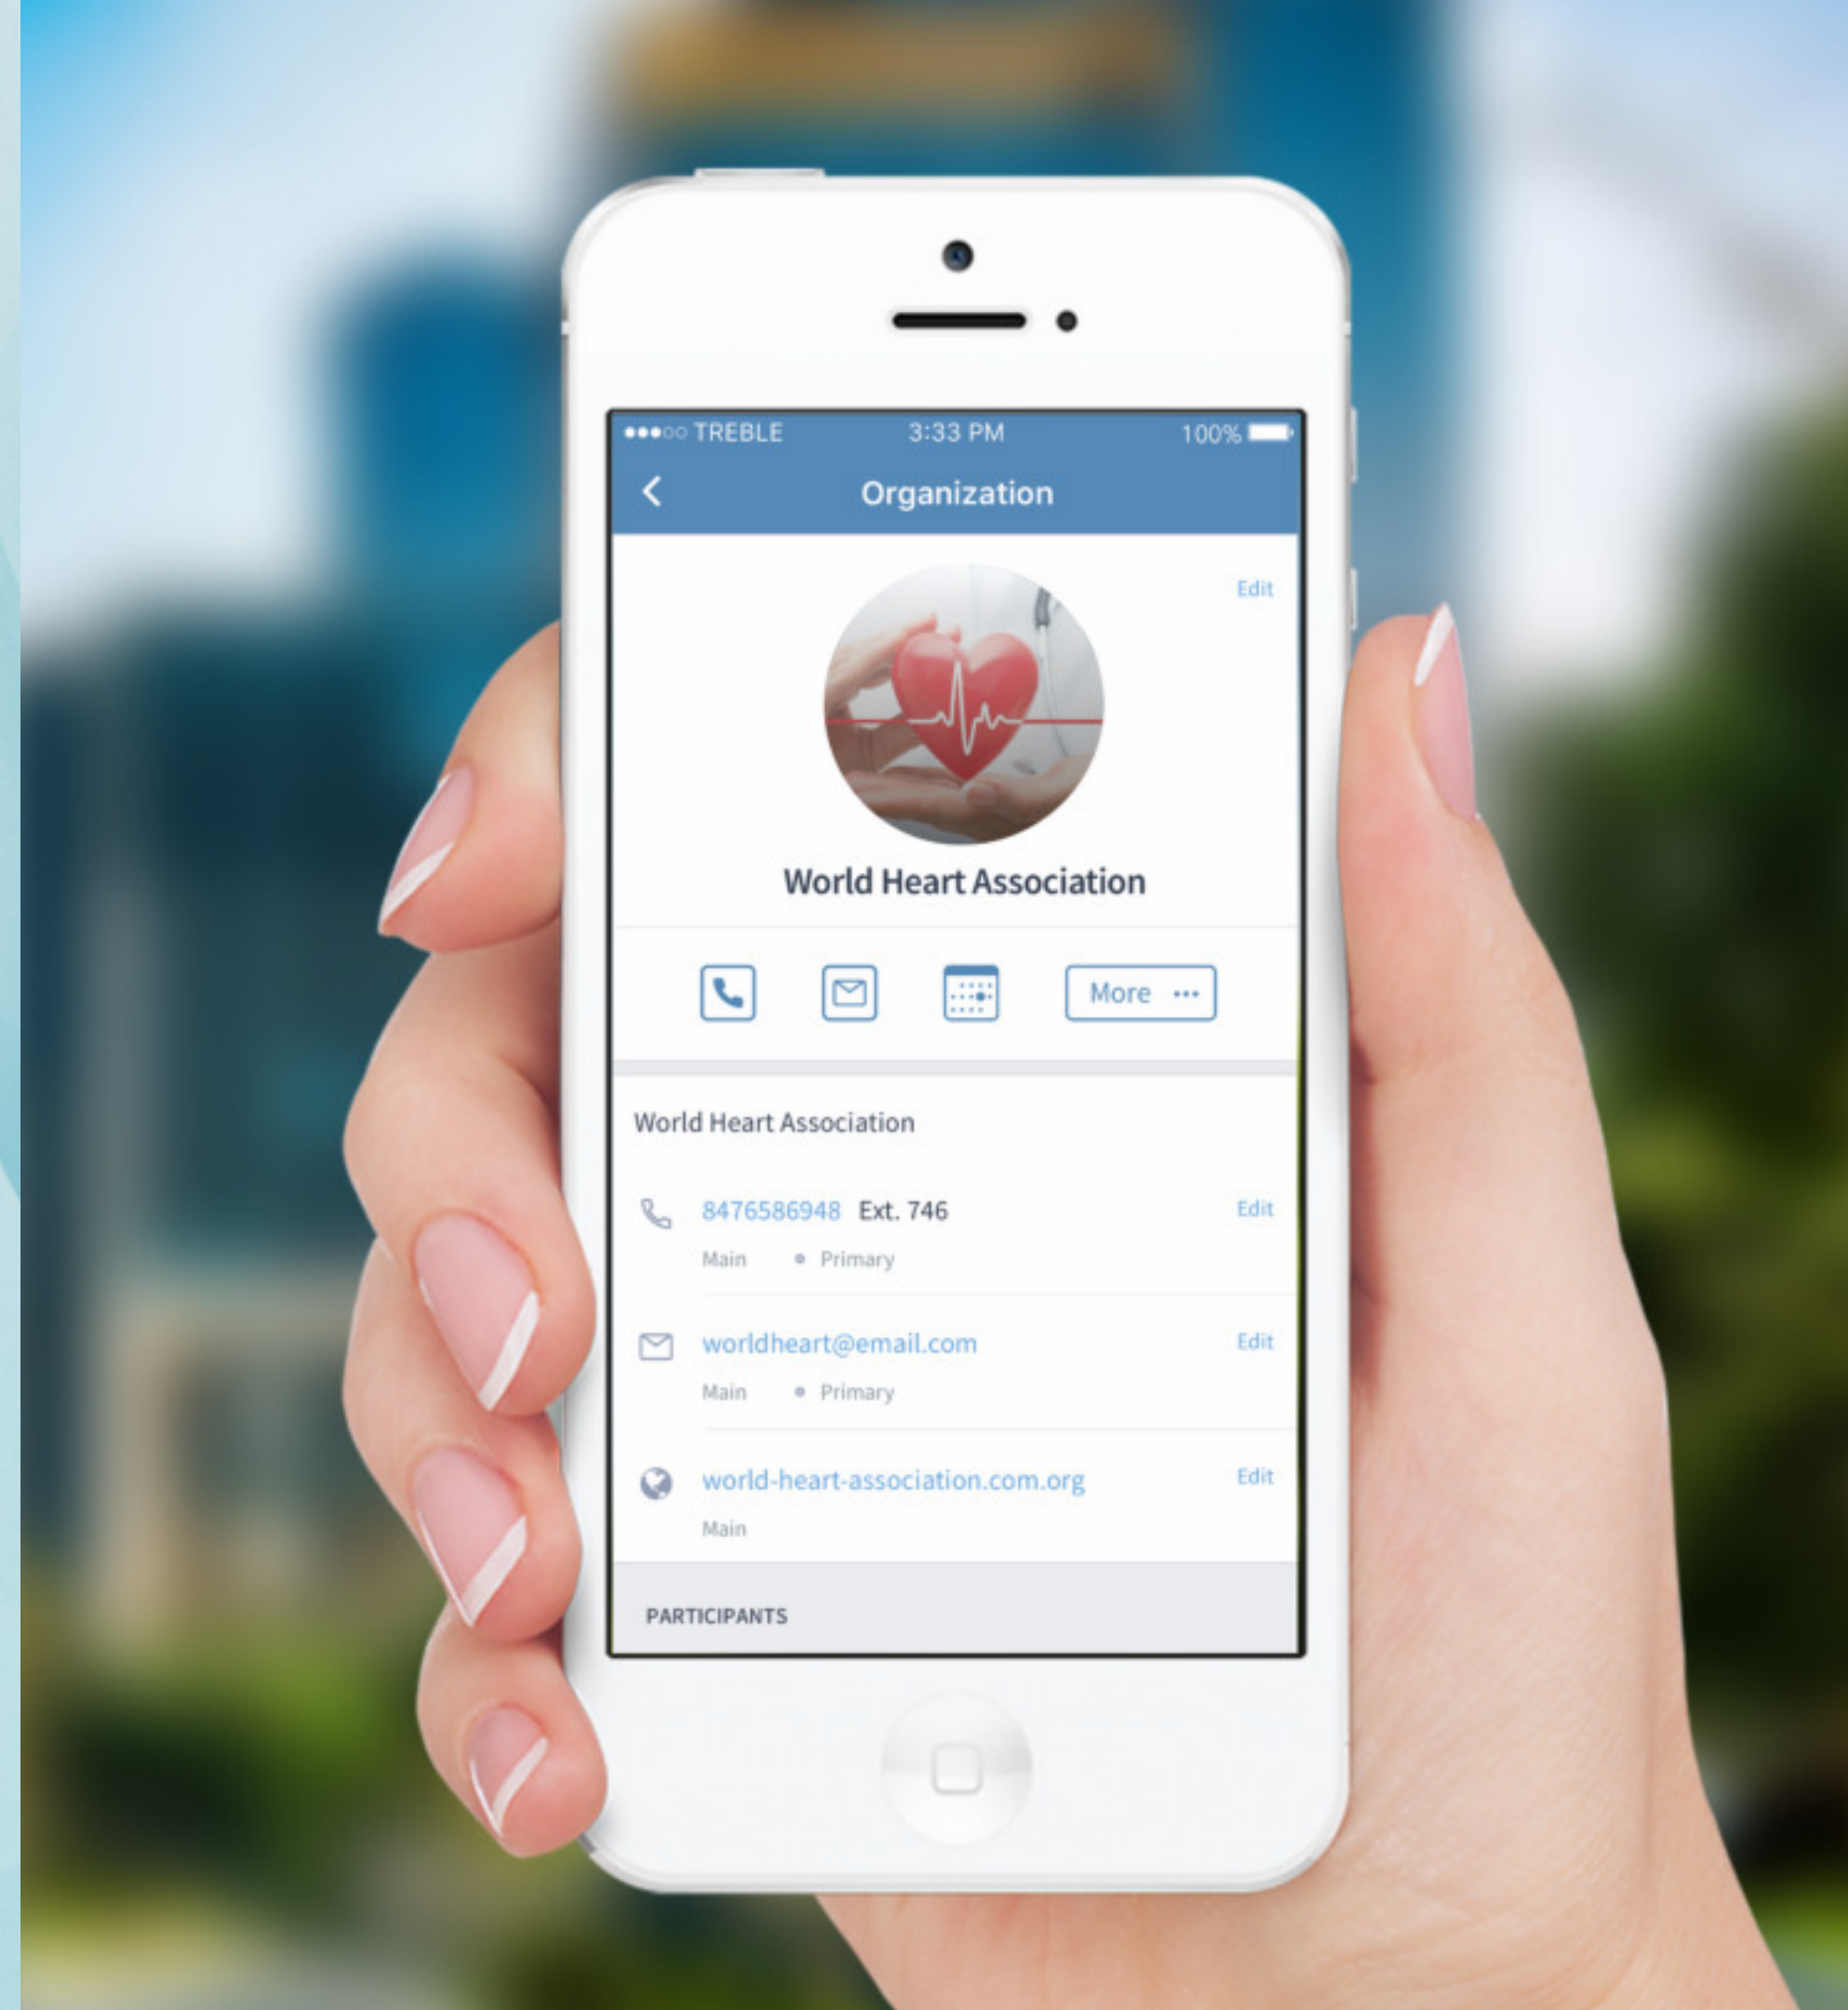

Native Mobile Application for CiviCRM

CiviMobile is a mobile app built to make the most of CiviCRM, the greatest CRM for nonprofits.

CiviMobile allows CiviCRM users to have constant access to the CRM data from their mobile devices and enter/view/edit it in a convenient and mobile-friendly way.

The app empowers nonprofit organizations with wide possibilities for managing internal processes, organizational contacts, activities, cases and events on the go.

CiviMobile app is compatible with Android and iOS platforms.

Who is CiviMobile for?

For multitasking members, volunteers and staff of nonprofit organizations.

Members of NGOs and nonprofits regularly leave their workplace, duty-bound to work with local communities. What they lack on such occassions is an access to the CRM system.
To make do, they collect business cards, write down or type in info only to forget to add it to CiviCRM when back in the office. Latest updates and required info on contacts, cases and events are often out of reach until back in the office.

How CiviMobile Meets the Need

With **CiviMobile**, members of NGOs and nonprofits are no longer office-bound by a desktop CiviCRM. What they have instead is a rich CRM functionality at their fingertips every time, with access to CiviCRM databases from everywhere.

All they need is just reach out to their pockets to add and update contacts, activities, events, memberships, relationships, and use many other functions even when offline, on the move, doing fieldwork, traveling, commuting, etc. No information overload, late updates or memory lapses.
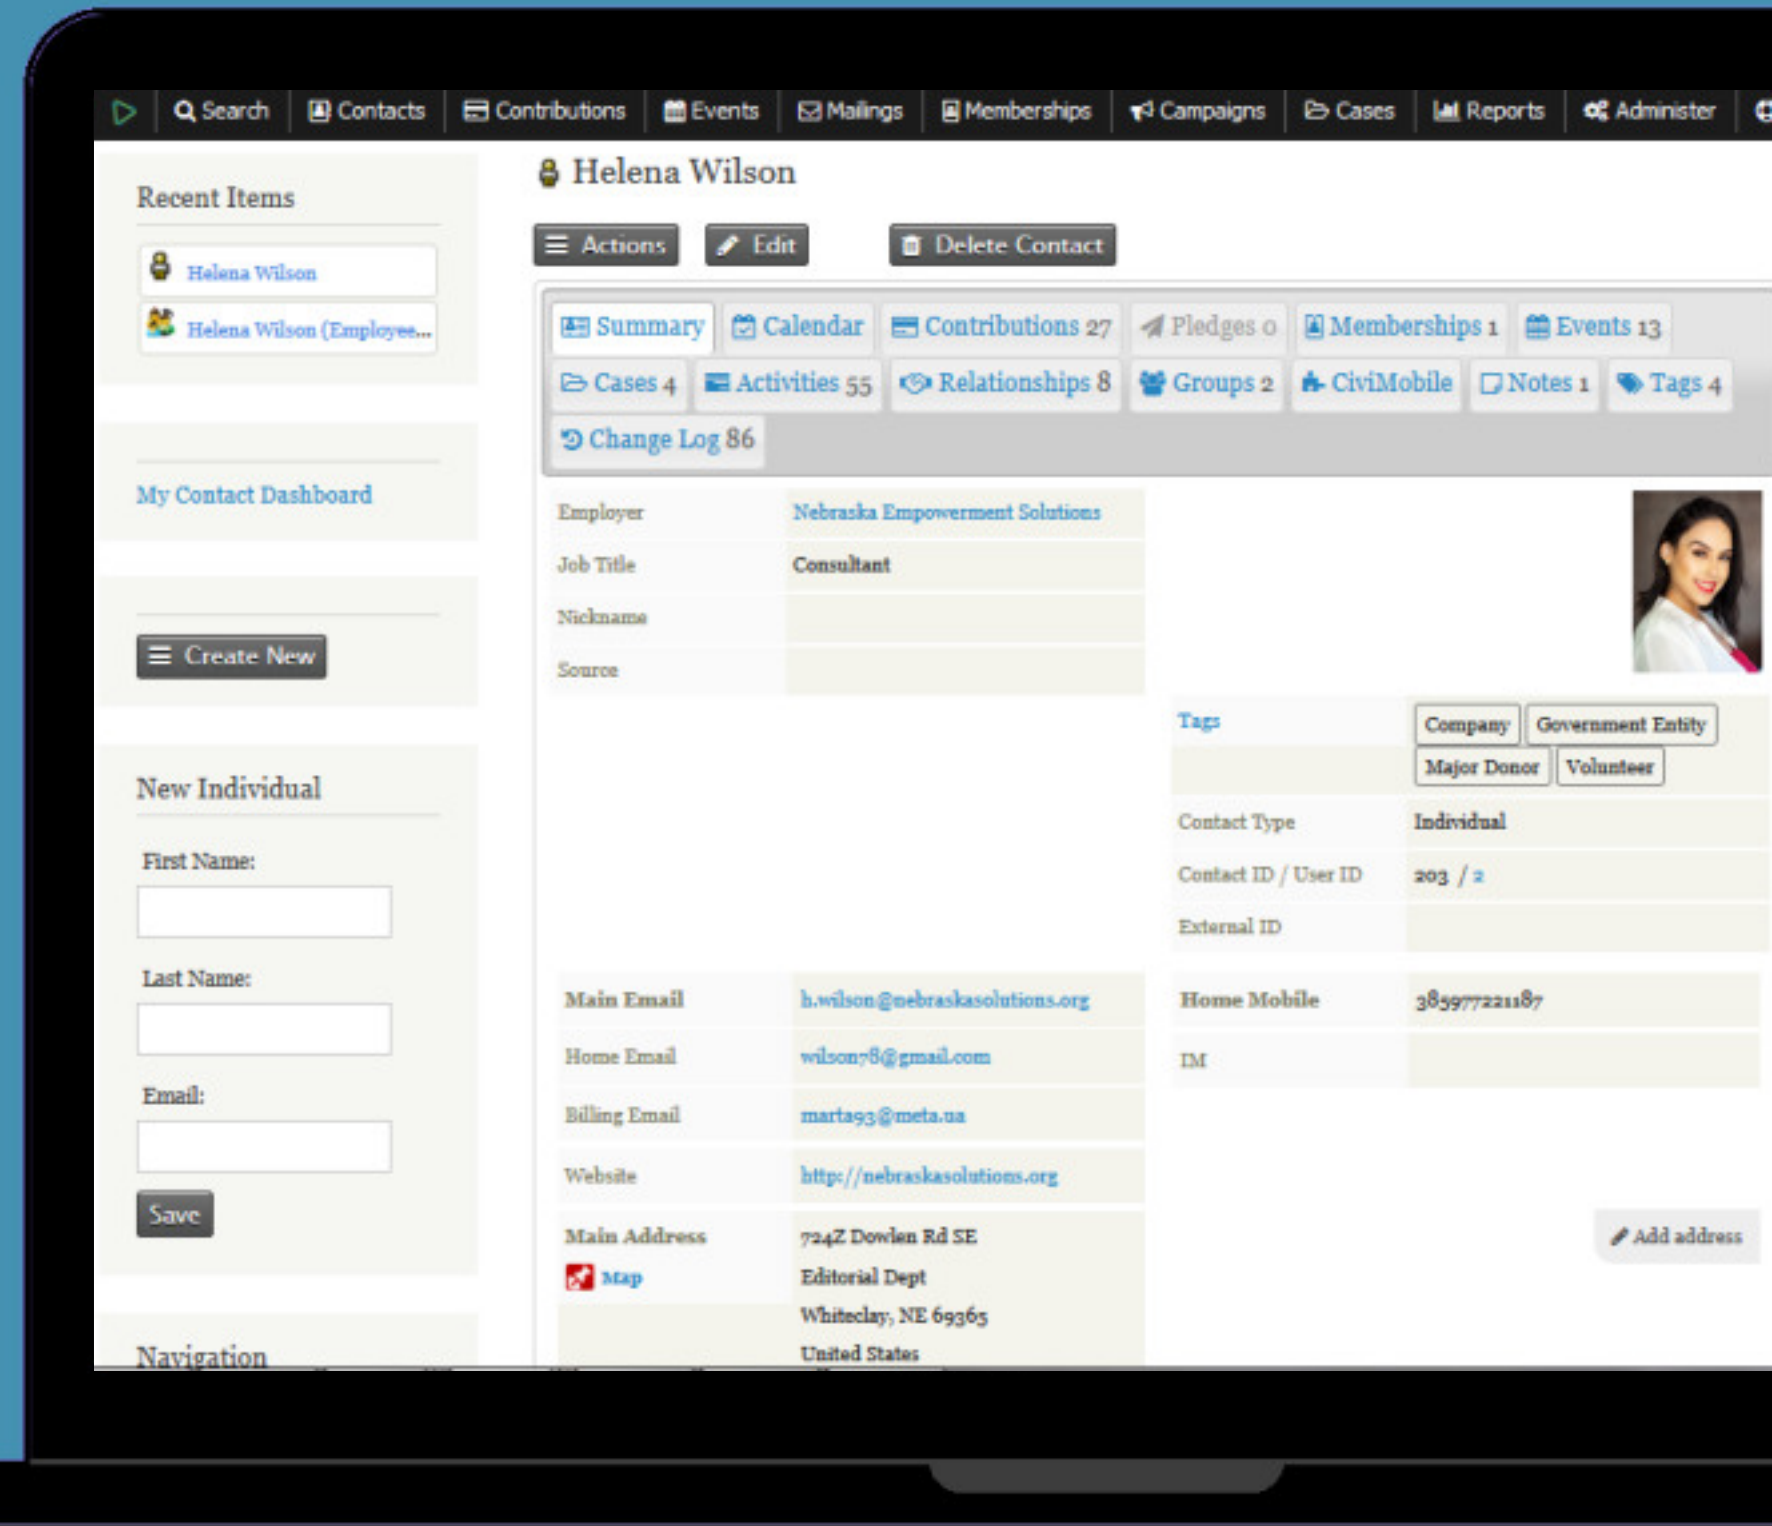

Why CiviCRM?

CiviCRM is the most popular open source CRM used by a wide range of nonprofit organizations of any size, budget, or focus.

It empowers over 11, 000 organizations with multiple features to effectively organize and track data about members, donors, volunteers, supporters, employees, manage relationships with constituents, realize fundraising initiatives and enhance communication channels, etc.

CiviMobile works with CiviCRM platform and allows users to reach their CiviCRM data anywhere and anytime.

CiviMobile Benefits

✓ Instant access to all required information in CiviCRM

✓ Ability to add information into CiviCRM straight from a mobile device

✓ Generating, organizing and updating contact profiles on the go

✓ Activity, calendar and contact details tracking anytime and from any place

✓ Real-time news updates and notifications

✓ Event registration, planning and on-site coordination with ease

✓ Offline access

and More...

✔ Offline mode for continuous work without delays

✔ 10+ languages support

✔ Branding for true identity

✔ Robust up-to-date documentation

✔ Tight security (secure connection, encrypted data, permissions, passwords/pin protection, possibility to clean a mobile device, etc)

✔ Possibility to explore CiviMobile in action on Demo-site

How To Start

Have your CiviCRM support CiviMobile in short steps:

1 | Install API extension on the server

2 | Check Permissions page on CiviMobile website and set appropriate permissions in CiviCRM

3 | Install CiviMobile app into your phone from the App Store or Google Play Market

4 | Open the app on your smartphone and enter your CiviCRM website URL

"The app is professional and intuitive" - Davy Ivins, Chief Executive

"This is a great app and will make the difference when it comes to choosing a CRM or another. I'm supposed to set up a CRM for our NGO and was very happy to learn that, thanks to your app, CiviCRM seems to be an excellent choice" - Sven Perbandt, Computer Scientist, Consultant

*"**Civi**Mobile has become an invaluable tool for managing, engaging and collaborating with our association's members. It not only keeps us connected, it's created greater community within our member base as well!"* - Terry Schalow, Executive Director

"I started using this a year ago... Love the new features. This developer is really responsive to feedback and support. Thanks for a great app" - Paul Chapman

"Really great app for convenient access to CiviCRM contacts and calendar! Took some trial and error getting the API installed on our website but worth the effort. :)" - Terry Stasio
